STLPNT Whitepaper

A simple, fixed-supply BEP-20 token on BNB Smart Chain

1. Abstract

Stillpoint (STLPNT) is a fixed-supply BEP-20 token deployed on BNB Smart Chain. It is intentionally simple: no taxes, no hidden functions, no rebasing, no reflections. Its design is built for transparency, trust, and accessibility. STLPNT serves as a base-layer liquidity asset tradable via decentralized exchanges like PancakeSwap and is structured for future governance and ecosystem expansion.

2. Introduction

The cryptocurrency landscape is filled with complex tokenomics, hidden mechanics, and short-term hype cycles. Stillpoint was created as a response to this complexity: a clean, transparent, fixed-supply token designed to be easy to understand, trade, and build upon. It aims to become a trusted asset within the decentralized finance ecosystem, while fostering a strong, organic community.
